CORNELL UNIVERSITY LIBRARY

LIBRARIAN'S REPORT
1914–15

To the President of the University:

SIR: I have the honor to submit herewith my annual report on the University Library for the year 1914–15.

The chief event of the year is Mr. Carnegie's generous gift of a fire-proof and burglar-proof treasure room for the safer keeping of the most valuable manuscripts and rarest printed books owned by the Library. This addition to the building is now in course of construction and will be completed within a few weeks. Such a treasure room was greatly needed, and our hearty thanks are given to Mr. Carnegie for his very welcome gift and for this evidence of his kindly interest in the Library. The need, however, still remains for a much larger extension of the north wing of the building to provide fitting quarters for the priceless Dante, Petrarch and Icelandic collections which, for ten years, have been crowded together, on one floor of the south stack, in surroundings which leave much to be desired in the way of facilities for the convenient use of the books by scholars. The printed catalogues of these important collections are likely to attract to the University, for study and research, increasing numbers of scholars and investigators who should be given all possible aid in their work. This extension is also urgently needed to provide properly for the rapidly growing card catalogue and for the administrative departments of the Library.

The growth of the Library, though interfered with to some extent by the effect of the European war upon the foreign book-trade, has been fairly satisfactory. The following table shows the additions made to the various more or less independent collections composing the University Library, during the year ending June 30th, 1915, and the present extent of each:*

	Volumes added in 1914–15	Present extent in	
		Volumes	Pamphlets
General Library	12,627	387,435	68,000
Law Library	1,409	47,231	
Flower Veterinary Library	235	4,681	
Barnes Reference Library	43	2,104	
Goldwin Smith Hall Library	31	2,207	
Stimson Hall Medical Library	53	1,385	
Agricultural College Library	1,216	8,906	
Forestry Library	1	1,180	
	15,615	455,129	68,000

*This report, with incomplete statistics, was handed in at the close of the academic year, June 16th, 1915, but, at the request of the President of the University, the statistics of the growth and use of the Library have been later brought down to June 30th, in conformity with previous reports and with the annual inventory.

The President White Historical Library, the Fiske special collections, the seminary and department collections are not separately enumerated in the table, but are included in the figures given for the general library. Of the additions to the general library (numbering 12,627 volumes) 4508 volumes were gifts. Of the additions to the other collections named in the table, the gifts number 217 volumes for the Law Library, 117 volumes for the Flower Library, 40 volumes for the Stimson Hall Library, two volumes for the Goldwin Smith Hall Library, and 31 volumes for the Agricultural College Library.

The English Collection, given at the close of last year by Professor J. M. Hart, was briefly mentioned in my last report, but without a definite statement of its extent. It has now been completely entered upon our accession books and classified, and has been found to contain 3013 volumes, partly included in the accessions for the current year. Among the gifts falling strictly within the year, the most noteworthy came from H. J. Patten, '84, who gave two hundred dollars for the purchase of English translations of modern foreign literature, and about 140 volumes have already been bought from this gift. A gift of about twenty-five dollars from J. A. Dix, '83, was used to provide a new set of the Century Dictionary for the reference shelves. The Cornell Menorah Society placed on permanent deposit in the Library a full set of the works issued by the Jewish Publication Society, and a complete set of the 'German Classics' was presented from the Jacob H. Schiff Fund. As heretofore, Ex-President White has been a generous contributor, his gifts during the year numbering 125 volumes. From Dr. R. A. Mead the Library received 82 volumes, chiefly in foreign literature, and from J. E. Widener a copy of the illustrated catalogue of pictures in the collection of P. A. B. Widener, issued for private distribution. Valuable contributions were also received from Mrs. R. C. H. Catterall, W. G. Bowdoin, H. B. Bradbury, I. W. Brewer, W. E. Griffis, J. P. Nicholson, and Sir Gilbert Parker. To you, Mr. President, and to many members of the University staff, the Library, as usual, is greatly indebted for frequent and valuable gifts. From the United States government and from many state and municipal governments, the annual supply of federal, state, and municipal documents has been received. The British, Canadian, and Australian Patent Offices continue to send regularly to the Library their valuable publications. These and the other gifts of the year have been duly acknowledged and a list of the donors will be submitted as an appendix to this report.

In addition to the income from the Sage Book Fund which still remains the chief source of our accessions, one-third of the free income from the Fiske Fund was, this year as last, made available for the purchase of books and periodicals, and for binding. This year brought a noteworthy addition to the book funds of the University in the fund of twenty-five hundred dollars, presented to Professor J. H. Comstock by his former students, for the establishment of a memorial library of entomology, and by him presented to the University, the income therefrom to be used in the formation of the "Comstock Memorial Library of Entomology," as indicated by the donors of the fund.

Among the more important purchases of the year from the Library funds a few may be mentioned: Colasanti's L'Arte Bisantina in Italia; Ramon de la Sagra's Historia fisica, politica y natural de la isla de Cuba; the Thesaurus Antiquitatum Italiæ of Grævius and Gronovius; Baring-Gould's Lives of the Saints; the

British Museum Catalogues of Greek Coins; a collection of works on Lepidoptera from the Kearfott library, including Romanoff's Mémoires sur les lépidoptères; complete sets of the Collections of the Chicago Historical Society, the Reports and Papers of the Associated Architectural Societies, the publications of the British Fire Prevention Committee, the Transactions of the American Society of Refrigerating Engineers, Hardwicke's Science Gossip, the Intermédiaire des chercheurs et curieux, Northern Notes and Queries, the Scottish Historical Review, the Revue d'histoire moderne et contemporaine, the Zeitschrift der Savigny-Stiftung für Rechtsgeschichte, the Zeitschrift für die gesamte Versicherungs-Wissenschaft. During the year the following sets have been completed; Annals of the New York Academy of Sciences, Publications of the American Museum of Natural History, Memoirs of the Boston Society of Natural History, Papers of the Military Historical Society of Massachusetts, Journal of infectious diseases, Journal of the Institute of Bankers and the Astronomische Nachrichten.

Dr. A. C. White reports that the regular accessions of the year, both to the general University Library and the Library of the State College of Agriculture and to the various departments, have been promptly classified and entered on the shelf-lists. The arrangement and classification of the English collection, given by Professor J. M. Hart, has been completed, and the books are ready for use. Miss O. R. Ayres, Head Cataloguer, reports that the number of volumes, pamphlets, and maps catalogued for the general card catalogue, during the year, was 17,613; for these 15,323 cards were written, and 5,453 printed cards were obtained from the Library of Congress, making in all 20,776 cards added to the card catalogue.

Miss Fowler, the Curator of the Dante and Petrarch collections, reports that, besides taking care of the regular accessions to these collections, she has been working steadily upon the printed catalogue of the Petrarch collection which is now passing through the press.

Mr. Hermannsson, the Curator of the Icelandic Collection, reports that, besides caring for the accessions, including a large number collected by him in Iceland last year, he has been engaged in preparing for the press the special catalogue of the Runic division of the collection, and this is now in the hands of the printers. For volume seven of "Islandica," now passing through the press, he has edited an Icelandic satire, from the beginning of the 18th century, by Thorleifur Halldorsson, with an introduction, and an appendix containing this author's Latin poems.

Professor Burr, the Librarian of the President White Historical Library, has nothing noteworthy to report, as, owing to the effect of the European War upon trade, he has been unable to make many purchases of importance during the year.

Mr. W. H. Austen, in submitting the statistics of the recorded use of the Library, reports as follows:

"The Library has been open 309 days during the year, being closed only on Sundays, Thanksgiving, Christmas, New Year's, Fourth of July, and Labor Day. The recorded use does not total quite as much as that for the year 1913–14. As the out-lying collections grow in size and use, there is sure to be a diminution in the use of the central library. Also the records of 1913–14 showed an unusually increased use over the year before. The efforts to keep books in the library when not in actual use have been rather more successful than usual, showing the bor-

rowers of books are more and more realizing the reasonableness of the efforts to protect the needs of all library users."

The registered users of the general library are as follows: University officers, 518, students 618, special borrowers 33, borrowing libraries 74.

STATISTICS OF RECORDED USE OF THE LIBRARY

	1913-14	1914-15
Reading Room use	98,346	89,017
Seminary Room use	3,744	2,838
Departments, including laboratory use	5,336	7,898
Home use, from general library	28,033	26,012
Home use, from open shelf circulating library	5,582	6,187
Libraries and foreign loans	204	233
Total recorded use	141,245	132,185

The number of students who have registered and have taken books for home use from the open-shelf circulating collection was 948, and the number of University officers 249. The number of readers who took advantage of the open shelf arrangement, and used books in the room only was 5250. During the year 28 volumes were temporarily recalled from this collection for class use in the general library. That the privilege, afforded in this open-shelf collection, of free access to the shelves in choosing books for general reading promotes this use of the books and is fully appreciated by the users of the Library, it seems to me is clearly shown in the fact, brought out by Mr. Austen's statistics of recorded use, that the books (6,187 volumes) taken for home use from this small collection, containing less than 4,000 volumes, form nearly one-fifth of all the books taken for home use from the general library as a whole. It is also worth noting that the wisdom of keeping this collection in a separate room from the open-shelf reference collection seems to be confirmed by the experience of Yale University, where, for some years, a similar collection, designed to "cultivate a taste for general reading as distinguished from special lines of reading in connection with courses of study," has been housed in the main reading room, and in the same room are shelved the books of reference and the reserved books. In his report for 1912, the Librarian says, "the room thus serves the double purpose of meeting the requirements of the general and the special reader. Experience shows that this two-fold combination of features is undesirable, at least as a permanent feature of the Library. In planning the completion of the Library building this difficulty should be borne in mind."

In connection with the report on the recorded use of the Library, Mr. Austen has submitted a statement in detail of the number of "reserved books" in the Library, from which it appears that the reserved books in the Library building, including the seminary rooms, number 17,444 volumes and that the reserved books in departments outside the Library building number 24,339 volumes.

Mr. Ellis, the Curator of the shelf department, reports that the usual inventories of the stacks have been made, with the following results: 631 volumes are missing from their places in the stacks as against 571 last year and 523 the year before. The number of volumes found on the wrong shelves is 295 as against 301 last year and 292 the year before. As usual more than this number were found in the wrong order, though on the right shelf.

In the first term of the year Mr. Austen gave his regular two-hour introductory course in bibliography. In the second term the two-hour course in general bibliography was given by the Librarian. The annual record of publications by the University and its officers will be prepared by Miss Speed of the catalogue department, and the list of donors by Miss Leland of the order department. These will be submitted later as appendices to this report.

In closing my last report as Librarian of the University I may be permitted to bear testimony to the loyal and faithful services of past and present members of the staff, to record my grateful appreciation of the confidence and support given to me by the University authorities throughout the forty-two years I have spent in the service of the Library, and to express my deep and abiding interest in its welfare and my gratification that I am still to retain a nominal connection with it as Librarian Emeritus.

Respectfully submitted,

GEO. WM. HARRIS,

Librarian.

—— [Reviews of] The foundations of character, by A. F. Shand. (Same, xxiii, p. 561. 1914); The great society, by G. Wallas. (Same, xxiii, p. 692. 1914); Le rhythme du progrès, by L. Weber. (Same, xxiii, p. 461. 1914); Work and wealth, by J. A. Hobson. (Same, xxiv, p. 335. 1915.)

Wright, W. W. Review of the history of pellagra with the report of a case. (State Hospital Bull., vii, p. 471. 1915.)

Wyckoff, D. B. Hon. Frank Irvine; practitioner, teacher, judge. (Case and Comment, xxi, p. 1035. 1915.)

Young, A. A. Depreciation and rate control. (Quart. Jour. of Econ., xxviii, p. 630. 1914.)

—— Depreciation and rate control: a reply and concluding comments. (Same, xxix, p. 378, 395. 1915.)

—— A general survey of the scheme of taxation in New York. (New York State Conference on Taxation. Addresses and proceedings, 1914. p. 404.)

—— Public borrowing for road building. (Cornell Civil Engineer, xxiii, p. 301. 1915.)

—— The question of depreciation in the valuation of the properties of public service companies. (Report on the Capital Entitled to Returns Invested in Property of the Houston Lighting and Power Co., 1914. p. 258.)

—— The Sherman act and the new anti-trust legislation. (Jour. of Polit. Econ., xxiii, p. 201, 305, 417. 1915.)

—— Should an allowance be made for depreciation in the valuation of public service properties? (Report on the Capital Entitled to Returns Invested in Property of the Houston Lighting and Power Co., 1914. p. 263.)

Also abstracts of about a hundred recent articles on statistics in the Amer. Econ. Rev., iv, v, 1914–15.

—— editor. Papers and proceedings of the 27th annual meeting of the American Economic Association. (Amer. Econ. Rev., v, No. 1, Supp. 1915.)

Zinnecker, W. D. Deutsch für Anfänger. Boston, 1915. sm. 8°. pp. xii + 380. Illus. (Heath's modern language series).

APPENDIX

TO THE

REPORT OF THE LIBRARIAN

1914–15

List of Donors of Books to the University Library, Including the Special Libraries

	VOLS.
Aberdeen University	1
Abrams, A. W	1
Academia Scientiarum Imperialis, St. Petersburg	1
Academy of Science of St. Louis	1
Adams, J. Q	6
